Development is being sought in every walk of life and you have to take on this process of development. Are you preparing to take on tomorrow's responsibilities? Are you building your capacity? Are you trained enough? If no, then go and prepare yourself because this is the time to prepare yourself for future responsibilities.

(Quaid-e-Azam Muhammad Ali Jinnah)

FOREWORD

Academy of Educational Planning and Management (AEPAM) under the Ministry of Federal Education and Professional Training is managing the National Education Management Information System (NEMIS). It is providing educational planning data and indicators to the government of Pakistan as well as other relevant stakeholders and UN Agencies under its global commitments.

The responsibility of NEMIS is to collate, consolidate, and analyze national education data and generate useful information to cater to the needs of policy makers, planners, managers and decision makers. NEMIS has identified and prepared a wide variety of information dissemination mechanisms. It has been instrumental in publishing Pakistan Education Statistics Report regularly.

This report titled "Pakistan Education Statistics 2012-13" comprises educational data pertaining to all categories of educational institutions of both public and private sectors from pre-primary to tertiary levels. It also includes data in respect of technical, vocational, teacher-training institutions, non-formal basic education of public and private sectors as well as deeni madaris.

NEMIS team is grateful to Mr. Muhammad Baleegh-ur-Rehman, Minister of State for Education, Trainings and Standards in Higher Education as well as Mr. Muhammad Ahsan Raja, Federal Education Secretary for their continued guidance and fullest support to AEPAM and NEMIS.

NEMIS team is grateful for cooperation extended by Provincial/Regional EMISs for providing the provincial/regional consolidated data to AEPAM. The efforts made by the NEMIS professionals for processing the data and producing this report are also duly acknowledged.

Dr. Allah Bakhsh Malik (Phd PAS)
UNESCO Confucius Laureate
Additional Secretary,
Ministry of Federal Education and Professional Training &
Director General, Academy of Educational Planning and Management

REPORT AT A GLANCE

The Pakistan Education Statistics 2012-13 report, includes an analysis of education system of Pakistan.

The report is divided into two sections.

Section 1: "An Analysis of Education Statistics" focuses on the analytical aspects through trend analysis as well measuring the effectiveness of our education system. A number of key educational indicators are used for this purpose. The indicators selected for this section were chosen primarily because of their policy relevance and available data.

Section 2: "Education Statistics" focuses on providing a detailed picture of the education system through statistical tables.

Section 1: An Analysis of Education Statistics

This section is organized in four chapters:

Chapter 1: Introduction

This chapter gives a brief introduction of education system of the country. It also explains how Education Management System (EMIS) is working in Pakistan? and what are limitation of data used for this publication.

Chapter 2: Educational Statistics: An Overview

The chapter highlights the basic educational statistics of all sectors of education in the country.

Chapter 3: Educational Trends

This chapter compares the public sector educational data up to higher secondary level of all the Province/Regions of Pakistan. The basic components of education, including institutions, enrolment and teacher of all the provinces/regions are highlighted in this chapter.

At the end of the report, the method of calculation of indicators used in this report is given for readers to calculate these indicators for their own data.

Chapter 4: Effectiveness of the Education System

The chapter is further segregated into three parts. Part 1 covers the indicators used to measure the accessibility of education system in the country. GIR, GER and Transition Rate are the selected indicators used in this part of the chapter.

The second part of the chapter looks at the indicators of equity in education system of

the country. It covers the Gender Parity Index (GPI) of enrolment ratios, percentage of female teachers and percentage of female enrolment as equity indicators.

Quality of education is also a major concern for education planners and managers; therefore, part three of the chapter discusses some of the key indicators used to measure quality of education system in the country. The indicators discussed in this part of the chapter are Survival Rate, Pupil-Teacher Ratio, Pupil-Classroom Ratio and Availability of Physical Facilities.

Section 2: Education Statistics

This section focuses on presenting the detailed education statistics through statistical tables. The section is further categorized into four parts according to the category of data.

Part I: Institutions

Statistical tables depicting information about education institutions of all the Provinces/Regions are placed in this part of the section. All the three sectors of education are covered in this part.

Part II: Enrolment

Data related to enrolment is tabulated in this part. Key enrolment related statistics for the entire education system of the country are placed here.

Part III: Teachers

Statistics about teaching staff serving in different sectors of education and in different provinces/region are placed in this part of section 2.

Part IV: Physical Facilities

The data of physical facilities of education institutions plays a vital role in educational planning and policy making. The data related to physical facilities available at public sector educational institutions is provided in this part.

At the end of report, the Glossary of important terms is provided.

SECTION 1

An Analysis of Educational Statistics

CHAPTER 1: INTRODUCTION

CHAPTER 2: EDUCATIONAL STATISTICS: AN OVERVIEW

CHAPTER 3: EDUCATIONAL TRENDS

CHAPTER 4: EFFECTIVENESS OF EDUCATION SYSTEM

CHAPTER 1: INTRODUCTION

1.1 Introduction

The Islamic republic of Pakistan emerged as an independent sovereign state on 14th August 1947, as a result of the division of former British India. It lies between 23-35 to 37- 05 north latitude and 60-50 to 77- 50 east longitude touching the Hindukush Mountains in the north and extending from the Pamirs to the Arabian Sea.

Pakistan is situated at the junction of three major regions of Asia: Central Asia to the north, the Middle East to the west and the Indian Subcontinent to the east and southeast.

Pakistan covers 796,095 km² with a population of about 185 million. Amongst this high load of population, around 64% of country population is living in rural vicinity with lack of sufficient resources for their life.

The country is divided into eight administrative units i.e. provinces/regions:

Provinces / Regions	Area (km²)	Population
Punjab	205,344	98,355,124
Sindh	140,914	43,132,270
KP	74,521	24,277,163
Balochistan	347,190	9,277,581

AJ&K	11,639	3,782,589
GB	72,520	1,228,650
FATA	27,220	4,306,565
ICT	906	1,361,976

Source: NIPS Projection 2012

Table 1.1: Area and population by Province/Region

The distribution of population in Provinces and Regions in percentage is shown in following figure 1.1.

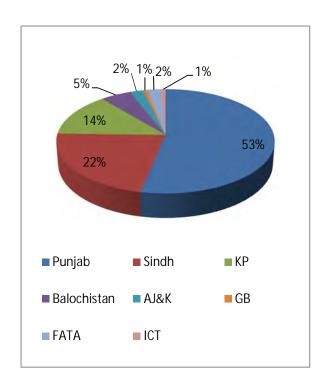

Figure 1.1: Population distribution by Province

Pakistan's HDI value for 2013 is 0.515 — in the low human development category — positioning the country at 146 out of 186 countries and territories. Between 1980 and 2013, Pakistan's HDI value increased from

0.359 to 0.515, an increase of 43.0 per cent or average annual increase of about 1.3 per cent.

The rank of Pakistan's HDI for 2013 based on data available in 2012 and methods used in 2012 is 146 out of 186 countries. However, it is misleading to compare values and rankings with those of previously published reports, because the underlying data and methods have changed, as well as the number of countries included in the HDI.

1.2 Education System in Pakistan

"The State shall provide free and compulsory education to all children of the age of five to sixteen years in such manner as may be determined by law."

Education is a fundamental human right and every child is entitled to it. It is critical to our individuals development as and as societies, and it helps cover the way to a successful and productive future. When we ensure that children have access to a quality education that is rooted in gender equality, we create a ripple effect of opportunity that impacts generations to come. Unfortunately, Education is one of the deprived fields of country and unable to get due attention by past governments. Current government has initiatives for building concrete educational foundation of

the country and gave considerable attention to the betterment of education.

On the Education Development Index, which combines all educational access measures Pakistan lies at the bottom with Bangladesh, in the region, and is considerably below in comparison to Sri Lanka. A similar picture is painted by the gross enrolment ratios that combine all education sectors, and by the adult literacy rate measures.

The Global Competitiveness Index (GCI) shows, Pakistan's performance is weak, on the health and education related elements of competitiveness, when compared with other countries in the region like India, China, Bangladesh, Sri Lanka and Malaysia.

The structure of education system in public sector is depicted in figure 1.1

1.3 National Education Management Information System

The Academy of Educational Planning and Management (AEPAM) was established in 1982. mainly charged with the responsibilities of capacity building of educational planners and managers, consolidating and collating education statistics. maintaining comprehensive national database, and conducting policy research to facilitate preparation of educational policies.

National Educational Management Information System (NEMIS) is operating in AEPAM as an integral part for professional activities. The main purpose of NEMIS is to consolidate and collate education statistics. maintain comprehensive national education database. standards set for quality improvement of education data, and provide technical support to the provincial and district EMISs for enhancing their capacity to generate and maintain data.

1.4 Data Compilation Mechanism

The Provincial/Regional EMIS units are responsible for collection, compilation, analysis and dissemination of education statistics/data of their respective provinces/regions. These units usually collect data through their district EMIS cells by conducting annual school census. The provincial/regional data is transmitted to NEMIS for consolidation at national level.

NEMIS plays a coordination role in addressing crucial issues and problems in respect of compatibility of questionnaires, statistical terminologies, data requirement for development of core educational indicators, discrepancy and inconsistency in data, data reliability and validity, non-availability of data of private schools and timely availability of data.

1.5 Data Limitations

The numbers shown in this publication were tabulated from *National EMIS* databank developed by National Education Management Information System. These data have several limitations that need to be mentioned.

The data of other public and private sectors of education used in this publication is based on estimation on National Education Census (NEC) data. This data was originally collected during NEC 2005-06.

The last population census was conducted in 1998. The projected population data is used in this publication to calculate different indicators based on population data. This projection was made by NIPS.

The structure of education sector in Pakistan (Pre-primary to Higher secondary level)

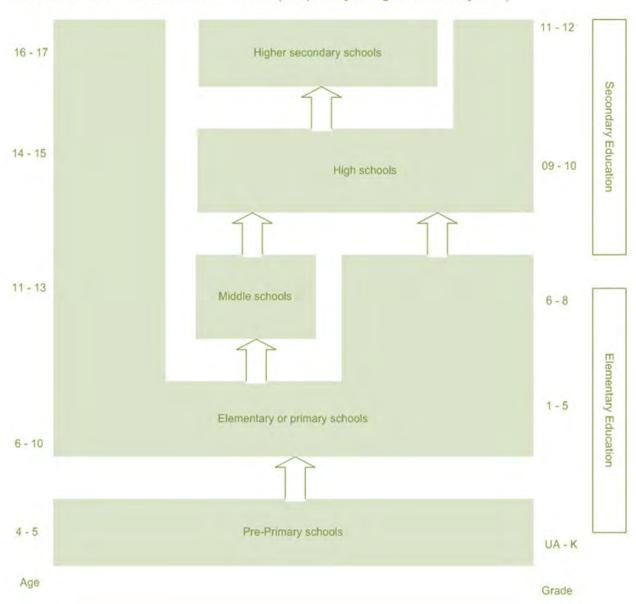

Figure 1.1: The structure of education sector in Pakistan (Pre-Primary to Higher Secondary)

CHAPTER 2: Education Statistics: An Overview

The education system of Pakistan is comprised of 255,044 institutions and is facilitating 41,822,212 students with the help of 1,598,552 teachers. The system is composed of 175,695 public institutions and 79,349 private institutions. The sector wise distribution of educational institution in percentages is shown in figure 2.1.

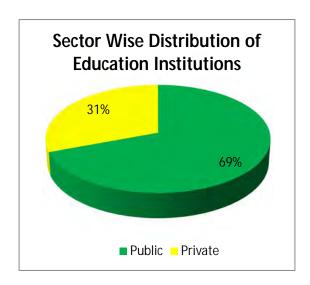

Figure 2.1: Distribution of Institutions by Sector

The public sector is an important player in providing education services, but making high-quality education accessible for all requires innovative programs and initiatives in addition to public resources and leadership. There are ways in which the public and private sectors can join together to complement each other's strengths in providing education services and helping to meet the Millennium Development Goals

(MDGs) for education and to improve learning outcomes.

The public sector is serving 26.46 million students to complete their education while the remaining 15.36 million students are in private sector of education. The sector wise distribution of enrolment in percentages is reflected in figure 2.2.

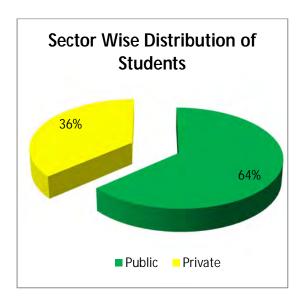

Figure 2.2: Distribution of Students by Sector in %

Figures 2.1 and 2.2 indicate that 31% of educational institutions are serving or facilitating 36% of students which hints at a slightly higher per-institution enrollment ratio in the private sector compared to the public sector. In the last decade, we have witnessed increased public interest and trust in the private sector, with the result that

the share of private sector is increasing gradually.

If we compare these two sectors of education in terms of teaching staff, we will find that 54% of teachers are providing their services to public institutions whilst 46% are employed by the private sector. This distribution is illustrated in figure 2.3

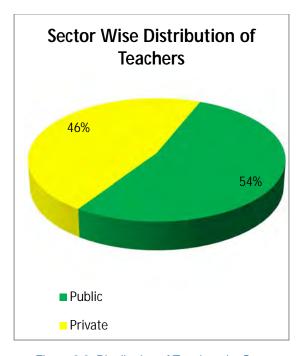

Figure 2.3: Distribution of Teachers by Sector

Figure 2.1 and 2.3 clearly point out the fact that the public sector of education has a deficiency in teacher. This fact needs to be investigated further, through research studies, to determine the causes behind this deficiency.

Now we will discuss the composition of the education system in Pakistan by gender. It is very sensitive issue and there is a lot of literature available at national and

international level on gender inequality in education. Our overall education system is facilitating 57% male students as compared to 43% female students as reflected in figure 2.4.

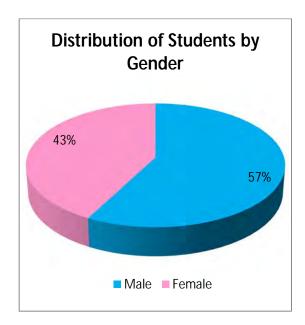

Figure 2.4: Distribution of Enrolment by Gender

The overall education system (up-to degree collages) is served by 44% of male teachers and 56% of female teachers as shown in figure 2.5.

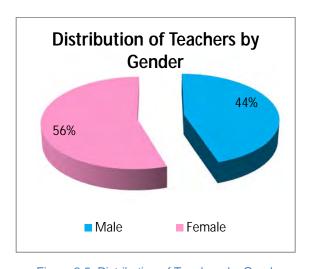

Figure 2.5: Distribution of Teachers by Gender

2.1 Education Statistics by Categories of Institutions

The educational institutions in the country can be divided into following categories:

- Pre-Primary
- Primary
- Middle
- High
- Higher Secondary
- Inter-Colleges
- Degree Colleges
- Universities
- Technical & Vocational Institutions
- Teacher Training Institutions
- Non-Formal basic Education
- Deeni Madaris

In the following sections, we will present an overview of the country's education system in terms of these categories of educational institutions. These broad categories will be by further analyzed from the view point of sector, gender and stage of education.

The distribution of education institutions in percentage according to above mentioned categories is shown in figure 2.6. There are no separate pre-primary institutions in public sector. The figure 2.6 reflects that the major part of our education system, that is 57%, is shared by primary schools. The universities have the least share in education system

i.e., 0.05%. There are only 139 universities in Pakistan.

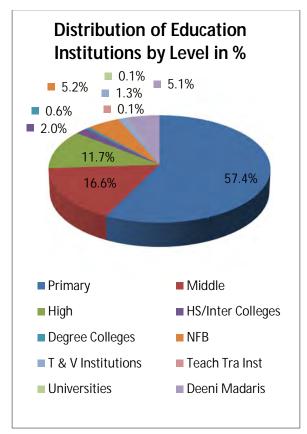

Figure 2.6: Distribution of Education Institutions by Level

2.1.1 Pre-Primary

Pre-primary education is the building block of a child's elementary education. It lays down the basic foundation of the all-round educational development of the child. Internationally, it is recommended that every child must be provided with pre-primary education so that they will be prepared to face the later stages of education.

In Pakistan there are no separate preprimary institutions in public sector. The total enrolment at pre-primary stage is 8.406 million. Public sector has an enrollment of 4.456 million (55%), whereas the private sector has 3.816 million (45%) enrolment. The distribution of enrolment in pre-primary stage in percentage is shown in figure 2.7.

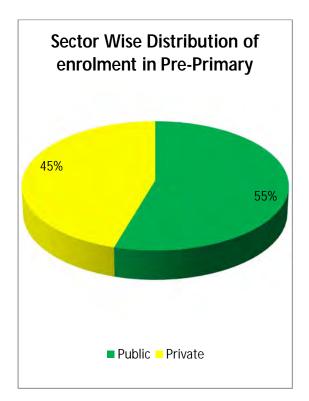

Figure 2.7: Distribution of Pre-Primary Enrolment

Since there is no separate allocation of teachers to the pre-primary level in the public sector, their number is not reported. Whereas the private sector has separate teachers for this level of education and their number are 2,187 in the private sector.

2.1.2 Primary

Primary education is the most important step in a child's educational career. It can make or break the child's educational career. It is a crucial stage in child's formative development and will shape the child into a learner, thinker and a social being.

In Pakistan there are a total of 146,185 primary schools, out of these 126,113 (88%) are in the public sector, whereas, 17,093 (12%) are in the private sector as reflected in figure 2.8.

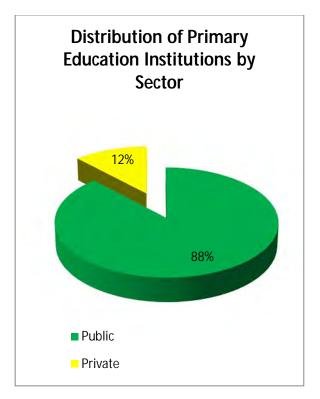

Figure 2.8: Distribution of Primary Education Institutions by Sector

The primary stage of education in Pakistan enrolls 17.574 million learners/students. Out of which 10.913 million (64%) are in public sector and 6.295 million (36%) are in private sector. The sector wise distribution of students studying at primary stage is shown in figure 2.9.

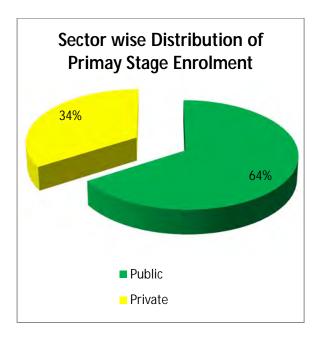

Figure 2.9: Distribution of Enrolment by Sector

Out of the total enrolment at primary stage, 9.832 million (56%) are boys and 7.742 million (44%) are girls as reflected in figure 2.10.

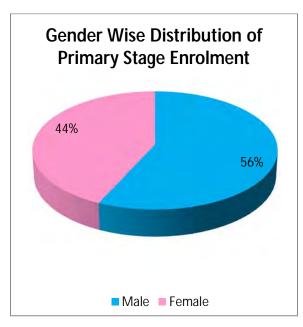

Figure 2.10: Distribution of Enrolment by Gender

The total number of primary teachers are 413,481 of which 330,024 (80%) are in

public sector, whereas, 83,457 (20%) are in private sector. This distribution can be seen in figure 2.11 below.

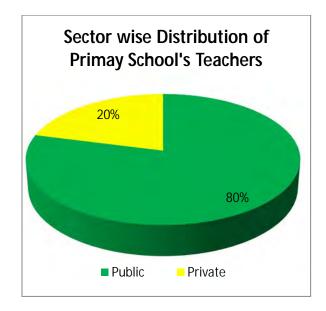

Figure 2.11: Sector wise Distribution of Teachers

If we compare figure 2.11 with that of 2.8, we will find that the share of public sector in terms of institutions is 88% while its share in terms of teaching staff is 80% as shown in figure 2.12

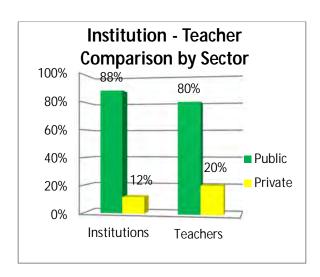

Figure 2.12: Institution-Teacher Comparison by Sector

The number of male primary school teachers is 216,848 (52%) and the number of female primary teachers is 196,633 (48%) as show in figure 2.13

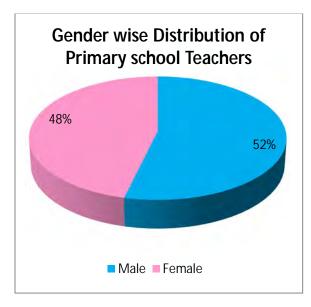

Figure 2.13: Distribution of Teachers by Gender

2.1.3 Middle

Middle schools (sometimes called intermediate schools or junior high schools) were formed in the early twentieth century and serve to function as the educational bridge between primary and secondary schools. Middle schools include grades six through eight.

In Pakistan, there are 42,147 middle schools of which 16,489 (39%) are in public sector, whereas 25,658 (61%) are in private sector. Figure 2.14 reflects percentage distribution of middle schools in public and private sector.

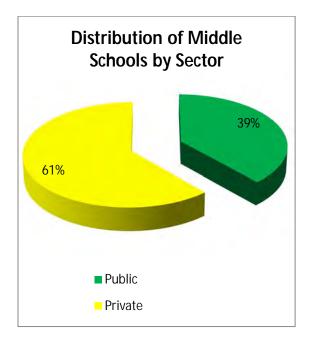

Figure 2.14: Distribution of Middle school in sectors

There are 6.119 million students enrolled in middle stage of education i.e., they are studying in grades VI-VIII. Out of these 4.039 million (66%) are in public sector, whereas, 2.079 million (34%) are in private sector as shown in figure 2.15.

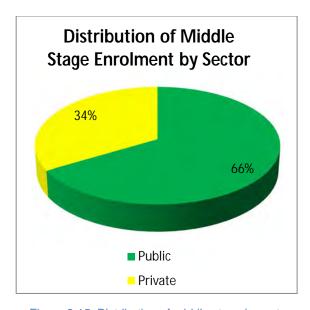

Figure 2.15: Distribution of middle stage in sector

The total boys enrolment at middle stage is 3.490 million, whereas, the girls enrolment is 2.628 million. The percentage distribution of enrolment in primary stage is shown in figure 2.16 below.

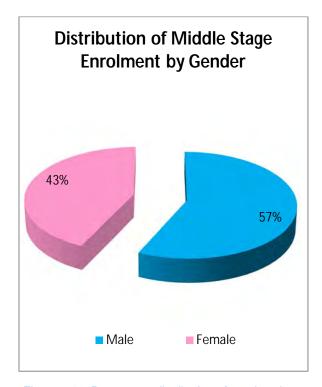

Figure 2.16: Percentage distribution of gender wise middle stage enrolment

The total number of teachers at middle level is 362,580 out of which 132,010 teachers are performing their duties in public sector. The remaining 230,570 teachers are providing their services in private schools. The percentage share of public-private sectors in terms of teaching staff is reflected below in figure 2.17. We can see that the share of private institutions at middle level is 64% while only 36% of total teachers at middle level are working in public sector.

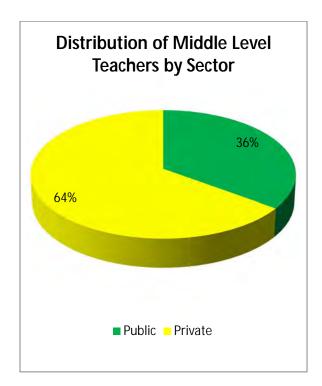

Figure 2.17: Percentage distribution of middle level teacher in sectors

There are 121,055 (33%) male teacher and 241,525 (67%) female teachers as shown in figure 2.18.

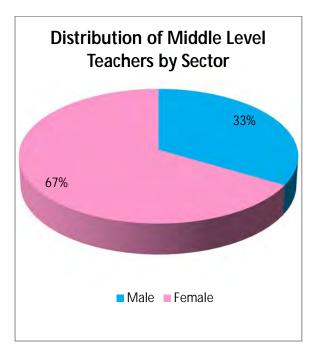

Figure 2.18: Percentage distribution of middle level teachers by gender

2.1.4 High

High school also known as secondary school is a term used to describe an educational institution where the final stage of schooling, known as secondary education and usually compulsory up to a specified age, takes place. It follows elementary or primary education, and may be followed by higher secondary education. High school in Pakistan usually including grades 9 and 10.

The education system of Pakistan contains 29,874 high schools, which is 11.73% of total institutions of both the public and private sector. Out of these 12,178 schools are in the public sector, whereas 17,696 are in private sector. The percentage distribution of these institutions is shown in figure 2.19.

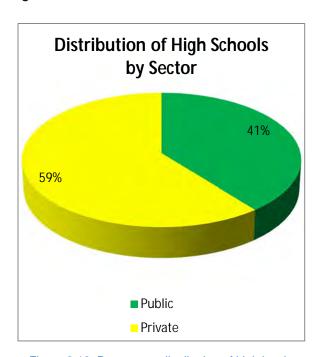

Figure 2.19: Percentage distribution of high level institutions

The total enrolment at high stage is 2.835 million, of which 1.879 million (69%) is in public sector, whereas, 0.887 million (31%) is in private sector as shown in figure 2.20.

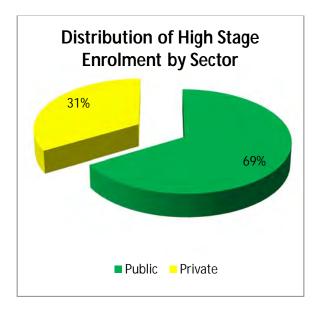

Figure 2.20: Percentage distribution of high stage by sector

The total boys enrolment at high stage is 1.647 million (58%), whereas, the girls enrolment is 1.118 million (42%) (Fig. 2.21).

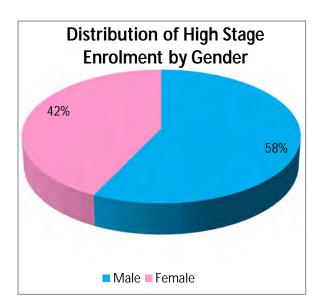

Figure 2.21: Percentage distribution of enrolment by gender

The total teachers at high school level are 489,588, out of which 216,452 (44%) are in public and 273,136 (56%) are in private sector as shown in figure 2.22.

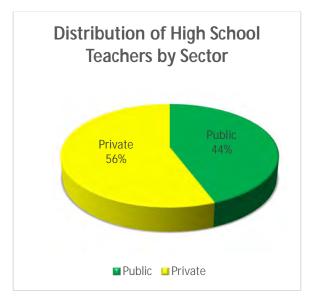

Figure 2.22: Percentage distribution of teacher at high level by sector

There are 202,360 (41%) male teacher and 287,228 (59%) female teacher sat this level, as shown in figure 2.23.

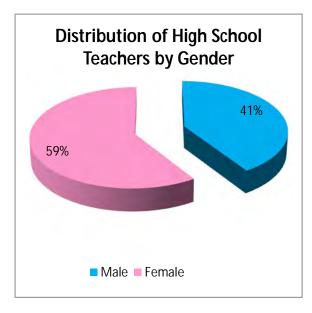

Figure 2.23: Percentage distribution of teacher as high level by gender

2.1.5 Higher Secondary / Inter Colleges

The Higher Secondary Schools and Inter Colleges, in Pakistan, usually include grades 11 and 12

There are 4,040 higher secondary schools/ inter colleges in education system of Pakistan. The share of these institutions in overall education system of the country is about 1.98%. The share of public sector in higher secondary level of education is 38%, it means that there are 1,521 institutions working under the umbrella of public sector. Whereas, 2,519 (62%) higher secondary institutions are working under private sector as shown in figure 2.24

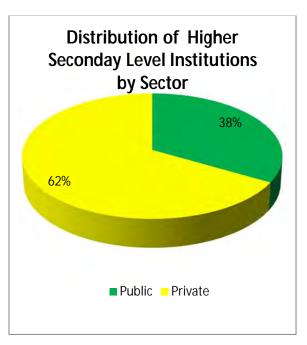

Figure 2.24: Percentage distribution of h. sec. institutions by sector

The total enrolment at higher secondary schools/ inter colleges stage is 1.356 million of which 1.216 million (90%) is in public

sector, whereas, 1.398 million (11%) is in private sector.

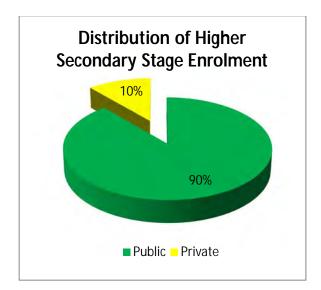

Figure 2.25: Percentage distribution of enrolment in higher secondary by sector

The total boys enrolment at higher secondary schools/ inter colleges stage is 0.979 million (72%), whereas, the girls enrolment is 0.377 million (28%).

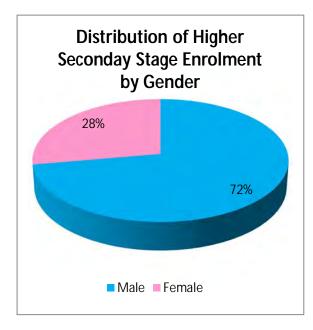

Figure 2.26: Percentage distribution of H. Sec. Enrolment by gender

There are 98,094 teachers working in higher secondary schools/ inter colleges level of education of the country. Out of these 45,202 (46%) are working in the public and 52,892 (54%) are in the private sector. The percentage distribution of teachers in higher secondary/inter colleges is reflected in figure 2.27

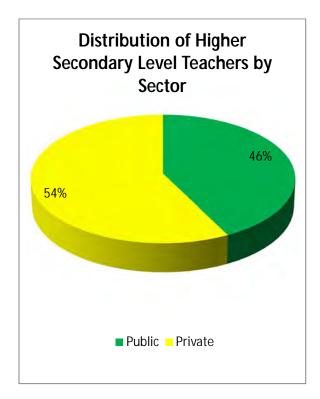

Figure 2.27: Percentage distribution of H. Sec./Inter colleges teachers by sector

The higher secondary/inter college level of education in the country is distributed almost equally among male and female teachers. There are 45,438 (46%) male teacher and 52,656 (54%) female teachers working at this level of education. The percentage distribution of higher secondary level teachers by gender is shown in figure 2.28

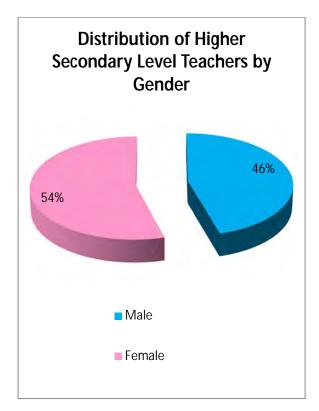

Figure 2.28: Percentage distribution of H. Sec. Teachers by gender

2.1.6 Degree Colleges

Undergraduate education (degree colleges) is an education level taken in order to gain one's first tertiary degree (except for an associate's degree). Undergraduate education is post-secondary education up to the level of a bachelor's degree. In Pakistan the Graduation system is classified into two Undergraduate (UG) and Postgraduate (PG) Systems. The undergraduate system takes two or four years to complete the degree. The two year undergraduate programs are mostly in the fields of arts, humanities, science etc., and the four year programs are mostly in the fields of technology, engineering, pharmaceutical

sciences, agriculture etc. However, for medicine, law and architecture, the period has been five years.

In Pakistan, 1,534 degree colleges are providing their services in education system. Out of these 1,419 (93%) are in public sector, whereas 115 (07%) are in private sector as shown in figure 2.29.

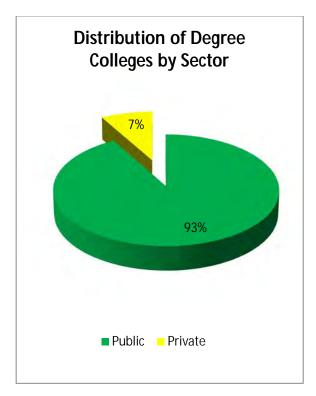

Figure 2.29: Percentage distribution of degree colleges by sector

The total enrolment at degree college stage i.e. in grades 13 and 14, is 0.641 million. Out of these students at this stage of education, 0.605 million (94%) are completing their degrees from public sector, whereas, rest of the 0.036 million (6%) students are in private sector as reflected in figure 2.30.

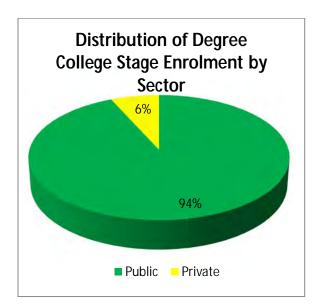

Figure 2.30: Percentage distribution of enrolment at degree college stage by sector

The total boys enrolment at degree colleges stage is 0.407 million (64%), whereas, the girls enrolment is 0.234 million (36%) as shown in figure 2.31.

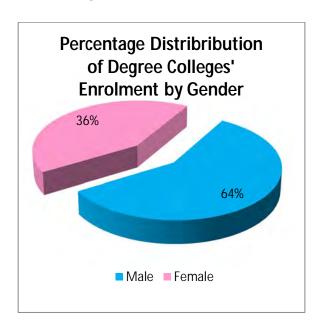

Figure 2.31: Percentage distribution of degree college stage by gender

The total teachers at degree colleges level are 49,413 out of which 47,388 (96%) are in public and 2,025 (4%) are in private sector.

The percentage distribution of teachers at degree level is shown in figure 2.32

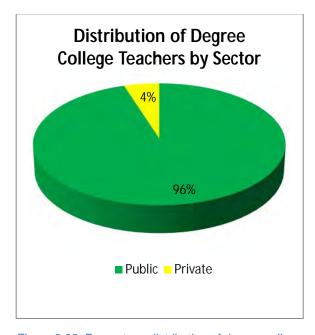

Figure 2.32: Percentage distribution of degree college teachers by sector

There are 29,490 (60%) male teacher and 19,319 (40%) are female teachers as shown in figure 2.33.

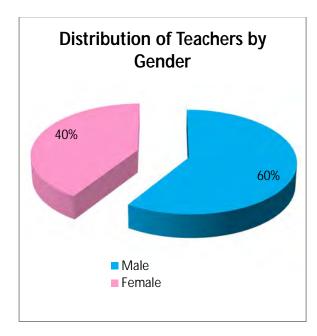

Figure 2.33: Percentage distribution of teachers by gender

2.1.7 Universities

A university is an institution of higher education and research which grants academic degrees in a variety of subjects. Traditionally, at this stage of education grades 15 and 16 are offered, however now universities are also offering grades 13 to 16 classes for completion of a four years bachelor's degree and grade 17 and 18 classes for completion of MS/M.Phil degree.

University education is more than the next level in the learning process; it is a critical component of human development worldwide. It provides not only the high-level skills necessary for every labor market but also the training essential for teachers, doctors, nurses, civil servants, engineers, humanists, entrepreneurs, scientists, social scientists, and a myriad of other personnel. It is these trained individuals who develop the capacity and analytical skills that drive local economies, support civil society, teach children, lead effective governments, and make important decisions which affect entire societies.

There are total 139 universities providing their services in both public and private sector of education. Out of these universities 79 (57%) are working under umbrella of public sector, whereas 60 (43%) are working under the supervision of private sector as reflected in figure 2.34.

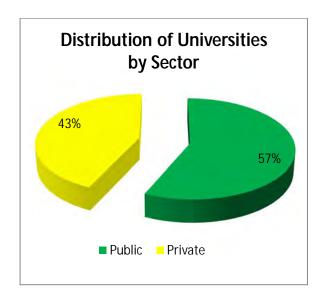

Figure 2.34: Percentage distribution of universities by sector

The total enrolment in the universities, i.e., at post graduate stage, is 1.594 million. Out of this enrolment 1.136 million (86%) students are enrolled in public universities, whereas, 0.230 million (14%) students are studying in private universities as shown in figure 2.35.

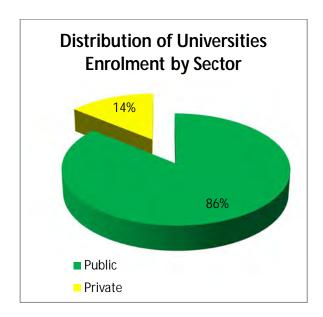

Figure 2.35: Percentage distribution of universities enrolment by sector

The total male enrolment in the universities is 0.789 million (50%), whereas, the female enrolment is 0.805 million (50%) as shown in figure 2.36.

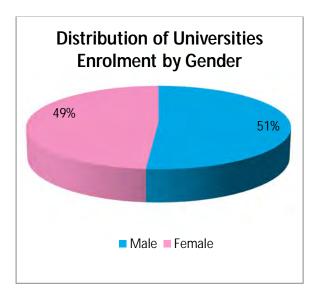

Figure 2.36: Percentage distribution of universities enrolment by gender

The total teachers in the universities are 77,557 out of which 60,017 (77%) are in public and 17,540 (23%) are in private sector (figure 2.37).

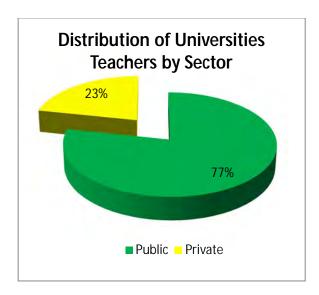

Figure 2.37: Percentage distribution of university teachers by gender

2.1.8 Basic Education Community Schools (BECS)

The notion of Basic Education Community Schools (BECS) has been a significant feature of policy debates around education in many countries for three decades. It has drawn attention to the importance and potential of education, learning and training that takes place outside recognized educational institutions. In community schools such as these the term non-formal education is broad and loosely defined to include all education outside the school system with no parameters of time and space (Shiror, 1995). It includes all learning and training that takes place outside recognized educational institutions.

In Pakistan, the total numbers of Basic Education Community Schools are 13,213. The total enrolment is 0.551 million and 13,213 teachers are performing their duties in these centers.

2.1.9 Technical and Vocational Institutions

Technical and Vocational education is an organized educational activity that offers a sequence of courses that provides individuals with the academic and technical knowledge and skills the individuals need to prepare for further education and for careers in current or emerging employment sectors; and include competency-based

applied learning that contributes to the academic knowledge higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, of an individual.

In Pakistan, there are 3,257 technical and vocational institutions of which 977 (30%) are in public sector, whereas 2,280 (70%) are in private sector as shown in figure 2.38.

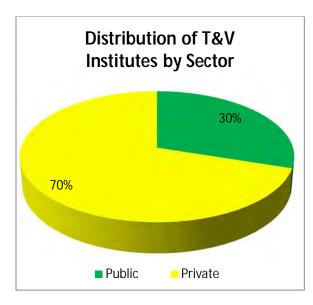

Figure 2.38: Percentage distribution of T&V institutions by sector

The total enrolment in the technical and vocational institutions is 0.289 million, of which 0.126 million (44%) is in public sector, whereas, 0.163 million (56%) is in private sector (figure 2.39).

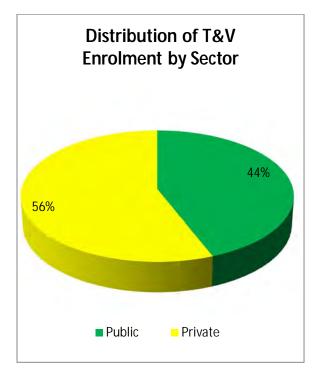

Figure 2.39: Percentage distribution of T&V Enrolment by sector

It has been seen that 30% of public technical & vocational institutions are serving 44% of total technical & vocational enrolment. While 70% of total teachers performing their jobs in 56% of private institutes.

The total male enrolment in the technical and vocational institutions is 0.179 million (62%), whereas, the female enrolment is 0.110 million (38%) as shown in figure 2.40.

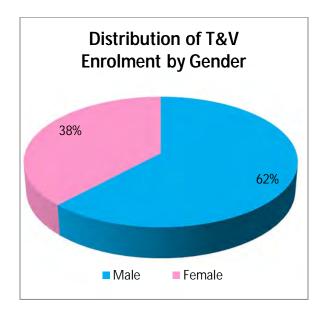

Figure 2.40: Percentage distribution of T&V enrolment by gender

The total teachers in the technical and vocational institutions are 15,847 out of those 7,976 (50%) are in public and 7,871 (50%) are in private sector as reflected in figure 2.41.

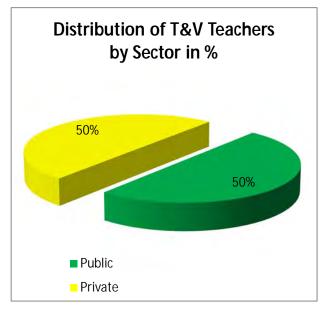

Figure 2.41: Percentage distribution of T&V teachers by sector

There are 10,775 (68%) male teachers and 5,071 (32%) female teachers.

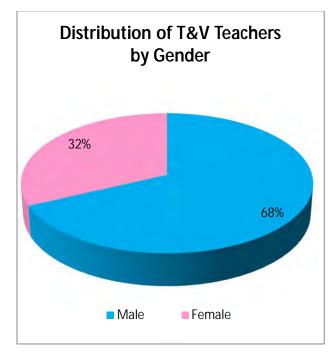

Figure 2.42: Percentage distribution of T&V Teachers by gender

2.1.10 Teachers Training Institutions

Teacher education refers to the policies and procedures designed to equip prospective teachers with the knowledge, attitudes, behaviors and skills they require to perform their tasks effectively in the classroom, school and wider community.

Although ideally it should be conceived of, and organized as, a seamless continuum, teacher education is often divided into these stages:

 Initial teacher training / education (a pre-service course before entering the classroom as a fully responsible teacher);

- Induction (the process of providing training and support during the first few years of teaching or the first year in a particular school); and
- Teacher development or continuing professional development (CPD) (an in-service process for practicing teachers).

There are 189 teachers training institutions, of which 155 (82%) are in the public sector, whereas 34 (18%) are in the private sector.

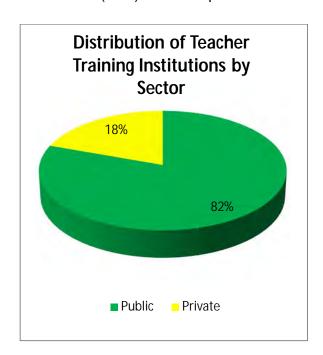

Figure 2.43: Percentage distribution of Teacher Training Institutions by sector

The total enrolment at teachers training institutions stage is 0.692 million of which 0.687 million (99%) are in public sector, whereas, 0.004 million (1%) are in private sector.

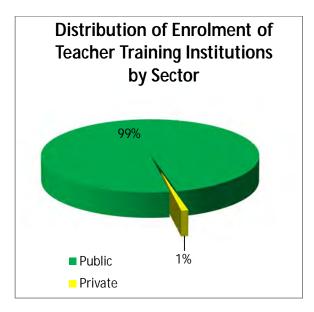

Figure 2.44: Percentage distribution of TTI enrolment by sector

The total male enrolment in the teachers training institutions is 0.460 million (66%), whereas, the female enrolment is 0.232 million (34%).

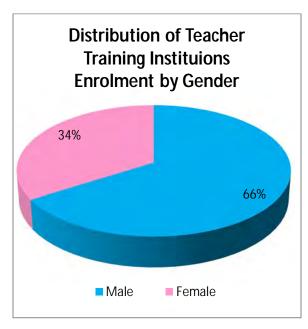

Figure 2.45: Percentage distribution of TTI's Enrolment by gender

The total teachers in the teachers training institutions are 3,651 out of which 3,372

(92%) are in public and 279 (8%) are in private sector.

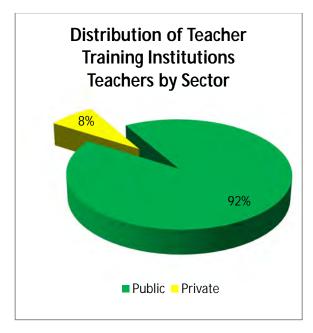

Figure 2.46: Percentage distribution of TTI's teachers by sector

2.1.11 Deeni Madaris

Deeni Madaris also play important and significant role in adult education and learning in Pakistan. The main emphasis of Madarassah education is Islamic Education and Teachings. However, a majority of the Madaris also teach formal education subjects as well.

Currently there are 13,075 Deeni Madaris working in Pakistan. Out of which 383 (3%) are in public sector, whereas 12,692 (97%) are in private sector.

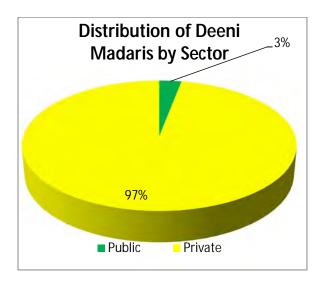

Figure 2.47: Percentage distribution of Deeni Madaris by sector

The total enrolment in the Deeni Madaris is 1.759 million of which 0.051 million (3%) is in the public sector, whereas, 1.707 million (97%) is in the private sector.

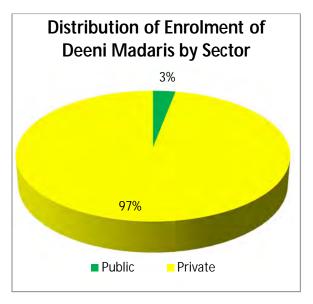

Figure 2.48: Percentage of Deeni Madaris enrolment by sector

The total male enrolment in Deeni Madaris is 1.095 million (62%), whereas, the female enrolment is 0.663 million (38%).

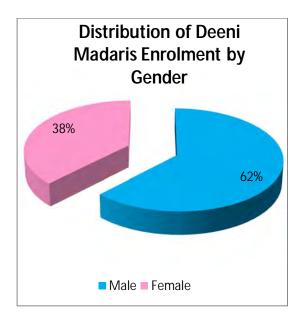

Figure 2.49: Percentage distribution of Deeni Madaris enrolment by gender

The total teachers in Deeni Madaris are 57,585 out of these 1,796 (3%) are in the public sector and 55,789 (97%) are in the private sector.

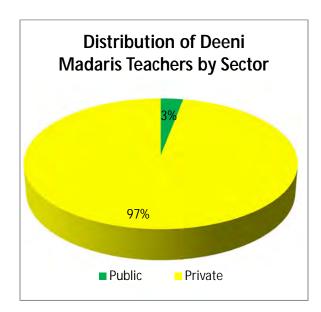

Figure 2.50: Percentage distribution of Deeni Madaris
Teachers by Sector

There are 44,427 (77%) male teacher and 13,158 (23%) female teachers.

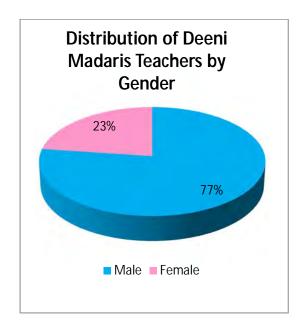

Figure 2.51: Percentage distribution of Deeni Madaris

Teachers by gender

2.2 Education Statistics by Location

Following is an overview of education statistics in view of location i.e. urban and rural. The distribution of education institutions by location in percentages is reflected in following diagram:

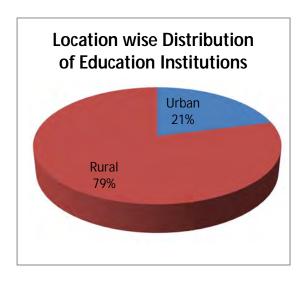

Figure 2.52: Distribution of Education Institutions by Location

2.2.1 Urban

There are 48,766 institutions located in urban area of the country out of which 62% are running under private sector of education.

These institutions are catering to 7,556,618 boys and 6,457,432 girls' students. The share of private sector in urban areas in term of enrolment is 53%.

A total of 206,197 male and 431,024 female teachers are providing their services in urban schools. 61% of total teachers are working under private sector of education.

2.2.2 Rural

A total of 176,405 institutions are functioning in rural areas of the country,

which is 78% of total institutions. The share of private sector of education in rural areas is 19%.

In terms of enrollment, 22,920,322 students are studying in rural areas. Out of these, 41% are female students. The private sector is catering to 25% of total rural areas students.

There are 810,258 teachers working in rural areas institutions. Out of these 48% are female teachers. Whereas, 277,518 teachers are performing their duties in private sector which is 34% of total teachers in rural areas.

Note: The Education Statistics by Location are upto the Degree College Level.

CHAPTER 3: Trends in Education Statistics

This chapter focuses on the analysis of data collected through Annual School Census (ASC) over the last six years. The intent is to discern whether there is some pattern in the values collected during this time period, with the intention of future planning and decision making.

The indicators used in this comparative analysis cover the census years 2007-08 to 2012-13, a six year time series to study trends in education. The basic components of education, including institutions, enrolment and teachers at National level are highlighted in this chapter.

Since ASC focuses on public sector institutions of primary to higher secondary levels, therefore, this chapter will compare the statistics of these public sector institutions over the time.

3.1 Institutions

Educational institution (school) is one of the major components of any education system. This part of the chapter will focus on the comparison of public sector educational institutions of primary to higher secondary levels. If we will compare the data of primary schools gathered over the period of six years, a decline of about 3.8% is

observed as shown in figure 3.1. There are multiple reasons of this decline:

- Up-gradation of primary schools to higher levels
- Closing of non-functional schools
- Merger of schools, due to nonavailability of teachers or lack of enrolment.

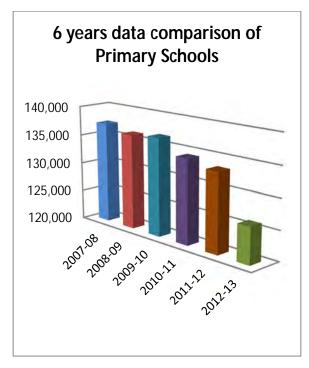

Figure 3.1: Six year comparison of primary schools

In contrast to primary schools an increase of about two percent (2%) is observed in middle schools over the same time period, as depicted in figure 3.2. This figure shows that in the census year of 2008-09 the number of middle school reached 15,410

that is a decrease of 1.8% as compared to 2007-08. Now in 2012-13, an increase of about 2.15% is observed against 2012-13 for middle schools throughout the country.

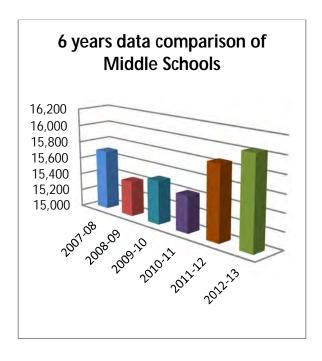

Figure 3.2: Six year comparison of middle schools

A continue increase in the number of high schools has been observed since 2007-08. From census year 2007-08 to 2012-13 a significant increase of about 18.14% is seen in number of high schools all over the country, as reflected in figure 3.3. The figure showing that the high schools are increasing with 1.45%, 2.80%, 2.02% per annum throughout the country. In 2012-13, an increase of about 6.73% is observed against 2011-12.

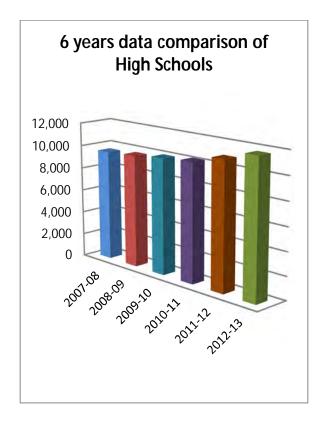

Figure 3.3: Six year data comparison of high schools

A very significant increase in number of higher secondary institutions has been observed over the time. The figure 3.4 shows that, in 2007-08 there were 998 higher secondary schools functioning in the country and now, in 2012-13, with the passage of six years, we have 1,404 higher secondary schools in our public sector education system. Over the focused time period, 406 (28.92%) higher secondary schools were added to the education system in our country. This significant increase is reflected in figure 3.4.

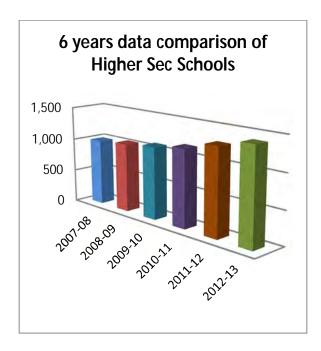

Figure 3.4: Six year data comparison of H. Sec.

3.2 Enrolment

It is a well-established reality that education is a key to economic development and social welfare. Investments in education yield returns in poverty reduction, improved health outcomes, and economic growth (UNESCO, 2007; Hannum & Buchmann, 2004; Herz & Sperling, 2003). In addition, increased access to education contributes to increased political participation and more equitable sharing of economic and political power (Birdsall, 1999).

Therefore, the main focus of every education system in any country is to attract and to retain children for development of the country. In this part of the chapter we see the trends in enrolment at different stages of education in the country over the focused time period.

At pre-primary stage of education, a decline of about 1.18% and 2.84% has been observed against 2011-12 in boys and girls enrolment respectively as shown in figure 3.5

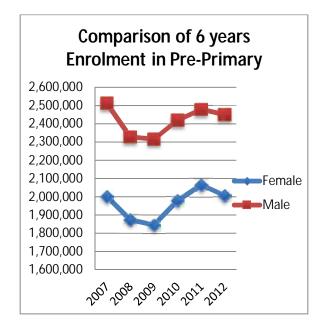

Figure 3.5: Six years pre-primary enrolment

Since 2007-08, a decline of 11.19% and 5.94% has been observed for boys' and girls' enrolment respectively, as shown in figure 3.6, at primary stage of education all over the country. This situation is not supporting our commitment towards the achievement of Millennium Development Goals (MDGs) in 2015. The Education Planners and Decision Makers should take necessary actions for the attraction of children at this stage of education. In this connection an EFA cell is established in AEPAM, Ministry of Federal Education and Professional Training.

The success of universal primary education is mainly depending upon the success of adult literacy policy of the country. If the illiterate parents are educated first, they could realize the importance of education and retention of their children at early stage of education in school.

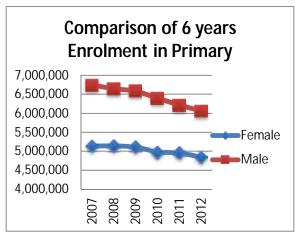

Figure 3.6: Six years data comparison of primary enrolment

At middle stage of education, an increase of 8% has been observed over the time. Only 4.31% of increase in boys' enrolment at this stage of education has been seen while a significant increase of 13.25% has been observed in girls' enrolment all over the country as shown in figure 3.7.

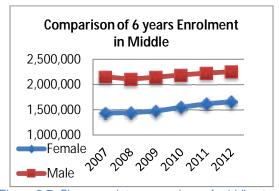

Figure 3.7: Six years data comparison of middle stage enrolment

In 2007-08, there were 1.02 million boys and 0.64 million girls enrolled at high stage of education all over the country. With the passage of six years, in 2012-13, the high stage of education is enrolling 1.11 million boys and 0.76 million girls. This shows an increase of 7.87% and 16.08% in boys and girls enrolment, respectively, over the time. The figure 3.8 shows the change in enrolment at high stage during the last six year.

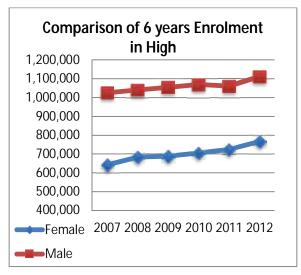

Figure 3.8: Six years data comparison of enrolment at High stage

A very significant increase of 35.95% in higher secondary stage has been observed all over the country. In census year 2007-08 there were 0.13 million students were enrolled at higher secondary education stage all over the country. Six years later, in 2012-13, the public sector of education in the country is providing its services to about 0.21 million students to complete their higher secondary education.

An increase of 40.12% in boys' enrolment has been observed at this stage over the time, while, in girls' enrolment 30.50% increase has been seen over the time as reflected in figure 3.9.

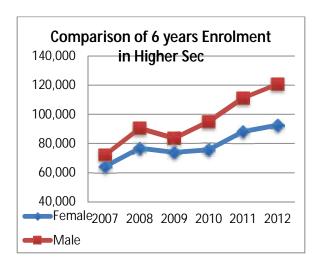

Figure 3.9: Six years data comparison of H. Sec enrolment

3.3 Teachers

Currently, the overall public sector education system is using services of 0.69 million teachers while six years earlier the system had the services of 0.65 million teachers, indicating that over this time period, 6.26% more teachers are added to the system.

We have observed a declining trend in the number of primary level institutions in previous section of this chapter; the same trend is also reflected in teachers' data over the period of time. A decline of 4.7% and slight increase of 0.67% has been observed in male and female teachers respectably. It clearly indicates that with the decline of in

number of primary schools, the number of teachers has also decreased as reflected in figure 3.10.

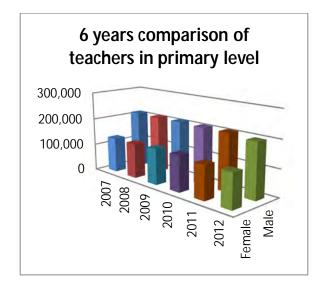

Figure 3.10: Six years data comparison of teachers working at primary level of education

Since census year 2007-08, there has been an increase of 4.68% in the number of teachers at middle level public schools. In 2007-08, there were 61,745 male and 57,113 female teachers performing their duties in public sector middle level schools while in current census year the number of male teachers has increased to 65,644 and that of female teachers is 62,295. An increase of 5.94% in male teachers and 8.32% in female teachers has been observed over the time in number of middle school teachers. In 2012-13, an increase is observed in female teachers i.e.7.27% as compare to 2011-12 as shown in figure 3.11.

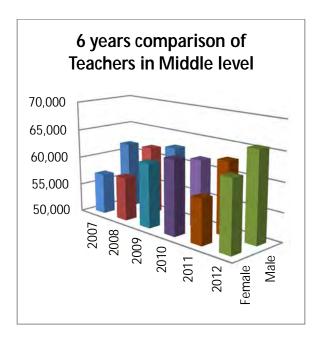

Figure 3.11: Six years data comparison of teachers working in middle schools

In high schools, the number of teachers has also increased during over the last six years. The number of high school teachers has risen to 207,187 from 168,311 since the census year 2007-08, i.e., an increase of 18.76% during last six years. An increase of 13.19% in number of high school male teachers is observed over the time. In case of female teacher a significance increase of 27.05% has been observed as reflected in figure 3.12.

A notable increase of 31.45% has been observed in number of public sector higher secondary schools over the period of six years. The number of both male and female teachers has increased during the period. A very significant 27.04% and 37.05 increased

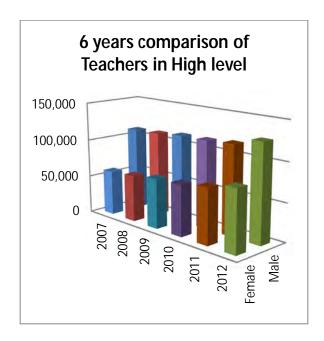

Figure 3.12: Six years data comparison of teachers in high school

for male and female teachers has been observed over the time, respectably. The six years comparison of higher secondary teachers is reflected in figure 3.13

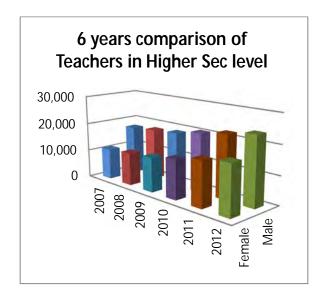

Figure 3.13: Six years data comparison of Higher Secondary teachers

CHAPTER 4: Effectiveness of Education System

In the path to economic recovery, education has become a central element of the countries' growth strategies. To be effective in the long run, improvements in education need to enable all students to have access to quality education without disparity, to stay in the system until at least the end of upper secondary education, and to obtain the skills and knowledge they will need for effective social and labor market integration.

Access, Equity and Quality of education are very important considerations while analyzing the effectiveness of an education system. For each of these important parameters, there are a number of indicators which can determine the level of access, equity and quality.

In this chapter, we will analyze and discuss these parameters in light of relevant indicators.

4.1 Access

Access means reach, a passage, an entrance or a doorway to education. It has two-way role:

 Physical approach: Availability of educational services for population at various levels, starting from primary to tertiary levels. Utilization of existing facilities: it is not only essential to provide education facilities but it is important that these facilities are utilized. The utilization is measured by various rates like GER, NER, GIR, NIR etc

Participation, a related concept, means that an individual has had the opportunity to experience an education training opportunity. Each child has a right to education and to have access to education institution. As the key to sustainable development, peace and stability within and among countries, it is an indispensable means for effective participation in the societies and economies of the 21st century. According to the Dakar Framework for Action (Senegal, April 2000). а collective commitment was made to attain several EFA goals, including the following:

- Ensuring that by 2015 all children with special emphasis on girls and children in difficult circumstances have access to and complete free compulsory primary education of good quality;
- ensuring that the learning needs of all young people and adults are met through equitable access to

- appropriate learning and life skills programmes; and
- achieving a 50 percent improvement in levels of adult literacy by 2015, especially for women, and equitable access to basic and continuing education for all adults.

In this context, Pakistan is required to meet the challenge of providing free and compulsory basic education to all children and adults, utilizing all the available financial, technical and human resources to extend the necessary education opportunities - through formal as well as non-formal means.

4.1.1 Gross Intake Rate (GIR)

Total number of new entrants in the first grade of primary education, regardless of age, expressed as a percentage of the population at the official primary schoolentrance age.

A high GIR indicates in general a high degree of access to primary education. As this calculation includes all new entrants to first grade, including over-aged and under-aged children entering primary school for the first time, the GIR can be more than 100 percent.

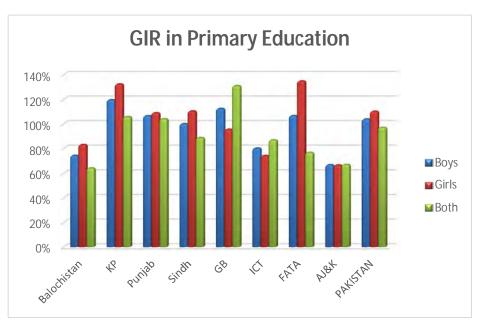

Figure 4.1: GIR in primary education

4.1.2 Gross Enrolment Ratio (GER)

The GER is the total enrolment for a particular education level (primary or secondary), regardless of age, expressed as a percentage of the eligible official schoolage population of that particular education level in a given school-year.

The GER is the most commonly used indicator to measure coverage. It shows the

overall coverage of an education system in relation to the population eligible for participation in the system. It is useful for those who are interested in the overall participation of the school-age population in a particular education level. It can be used for comparing different districts, provinces, regions, urban and rural provinces, boys and girls, etc.

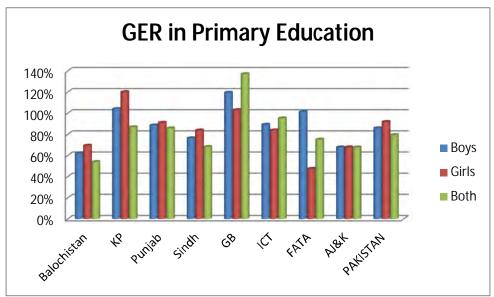

Figure 4.2: GER in Primary Education

The GER can be above 100 per cent, where the number of over-aged children in schools is high relative to children of the official age for the level. A high GER indicates a high degree of participation, whether the students belong to the official age-group or not. A GER value approaching or exceeding 100 per cent indicates a country is, in principle, able to accommodate all of its primary

school-age population. It does not, however, indicate the proportion of that population actually enrolled. GER in primary level of education is shown in figure 4.2.

4.1.3 Net Enrolment Ratio (NER)

The Net Enrolment Ratio (NER) is used to show the extent of coverage in a given level of education of children and youths official belonging to the age group corresponding to the given level of education. Figure 4.3 shows the NER in Primary Education.

In Pakistan, of all the primary-aged (5-9 years) children, 68% are enrolled in primary school. However, wide variance is displayed across province and sex.

The highest net primary enrolment rate is in KP (83%). This is followed by ICT (71%) and Punjab (70%).

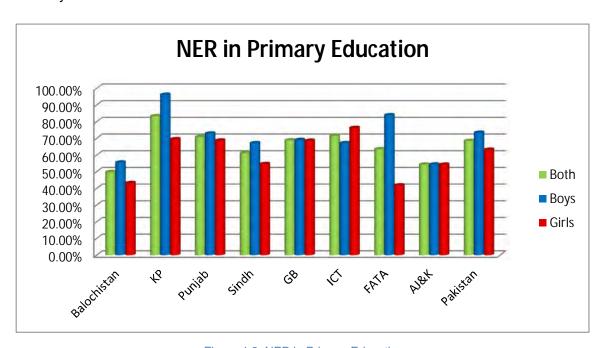

Figure 4.3: NER in Primary Education

4.1.4 Out of School Children

NEMIS gives a complete picture of net enrolment and out of school children for all provinces and federating units for both the public sector (formal and non-formal) and private sector.

The total number of out of school children at primary level is 6.1 million in all the four provinces and 6.7 million all over Pakistan including AJK, ICT, GB and FATA. The province wise total number of out of school children in all the four provinces is 3.2 million in Punjab, 2.1 million in KP, 1.8 million in Sindh and 0.54 million in Balochistan.

The overall population of primary age group boys in Pakistan is 11.8 million. Out of these 8 million are enrolled. Whereas remaining 3.8 million are out of school. About 40% out of school children live in Punjab province. In Islamabad Capital Territory twenty four thousand children are out of school.

The overall primary age group population of girls is 10.9 million. Out of these 6.4 million are in school and remaining 4.5 million are out of school. As in case of boys about 39% out of school girls live in Punjab province. Less number of girls as compared to boys are out of school in ICT.

Figure 4.4 shows the status of out of school children by province and gender.

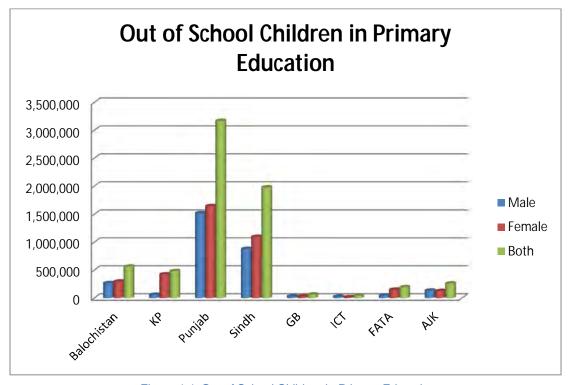

Figure 4.4: Out of School Children in Primary Education

4.1.5 Transition Rate

Transition Rate is the proportion of students that progress from the final grade of one level to the first grade of the next level, expressed as a percentage of those enrolled in the final grade of the preceding school year.

High Transition Rates indicate high access or transition from one level of education to the next. It also reflects the intake capacity of the next level of education. Inversely, low transition rates indicate problems in bridging between two cycles or levels of education, due to either deficiencies in the examination system or inadequate admission capacity in the higher cycle or level of education, or both.

4.1.5.1 Effective Transition Rate (ETR) between Primary and Lower Secondary Levels

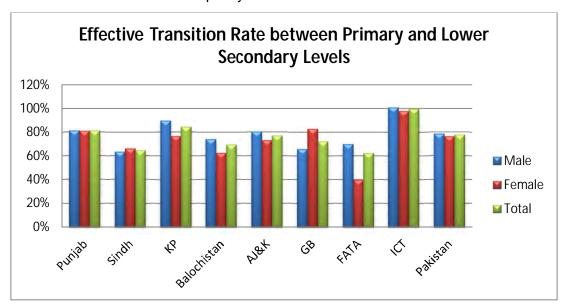

Figure 4.5: (ETR) Effective Transition Rate b/w Primary and Lower Secondary levels

Figure 4.5 reflects the Effective Transition Rate between primary and lower secondary levels of education. It is evident from the figure that except of Punjab and ICT, the ETR is less than 80% in remaining parts of Pakistan. This is an alarming situation, keeping in view that these areas, the GER at

primary level is in any case low, coupled with the fact that transition rate is also low leads to a scenario where a significant proportion of school going age population is excluded from the system at the very early stage of lower secondary level.

4.1.5.2 Effective Transition Rate between Lower Secondary and Upper Secondary Levels

Figure 4.6 shows the Effective Transition Rate between lower secondary and upper secondary levels.

4.2 Equity

Pakistan aims to achieve Millennium Development Goals and also aims to eliminate gender disparity at all levels of education by the year 2015.

In Education, equity reflects the extent to which access and opportunities for children and adults are just and fair. This implies reduction in disparities based on gender, We can see that the problem pointed out earlier persists here as well. Even lower levels of transition are observed, implying that gradually higher number of school age going children is getting out of the system.

poverty, residence, ethnicity, language, location, or other characteristics.

Any indicator can be calculated from the viewpoint of any one or more of the above divides. For example Gender Parity Index (GPI) can be calculated to highlight the equity based on gender. GPI on its own is meaningless unless used in the context of another indicator e.g. GPI for enrollment, GPI for NER, etc

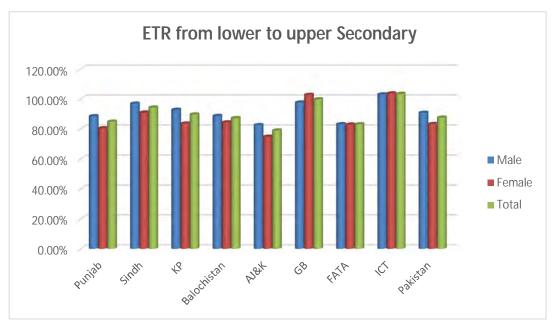

Figure 4.6: Transition rate b/w Lower Secondary and upper secondary levels

In this section, we will discuss equity in education system in terms of gender-related equity and region-related equity.

Gender-Related Equity

Gender refers to socially constructed roles and responsibilities of women and men. The difference in roles and responsibilities among women and men stems from our families, societies and culture. The concept of gender includes our expectations about the characteristics, attitudes and behaviors of women and men, and is vital in facilitating gender analysis. The different roles, rights and resources that both the genders have in society are important determinants of the nature and scope of their inequality and poverty. Inequality in access to resources between women and men is most common in poor and developing countries. Gender inequality refers to inequality in conditions among women and men for realizing their full human rights and potentials.

Region-Related Equity

This refers to the education opportunities of the people living in disadvantaged regions. In most cases, the disadvantaged regions are rural, but they can also be economically backward regions within an economy, and also the low income poor communities within urban areas.

Gender Inequalities in education exist in almost all poor countries and among the poor within these countries. There has been a considerable increase in gender inequality in education in low income countries over the last three decades (World Bank, 2001). Gender inequality is now considered as an essential concept for the analysis and alleviation of poverty because of its adverse number of valuable impacts on а development goals. Girl's access education is influenced by poverty in various ways.

4.2.1 Gender Parity Index (GPI)

The GPI reflects females' level of access to education compared to that of males. This is calculated for each school phase. A GPI of less than 1 indicates that there are fewer females than males in the formal education system in proportion to the appropriate school-age population. A GPI of more than 1 means that there are proportionately more girls than boys attending school. A score of 1 reflects equal enrolment rates for boys and girls.

Gender inequities continue to exist in many parts of the country. In certain cultures and traditions, girls are discouraged from pursuing an education. Reasons may vary from a belief that a woman's position is in the household rather than in the workplace, to a perception that boys are generally smarter

than girls, to labor markets that discriminate against women.

4.2.2 GPI for Enrolment Ratios in Primary Education

The gender differences in gross and net enrolment ratios in primary level of education are shown in following figures; this picture is mirrored in the provincial data. Figure 4.7 shows GPI for enrollment ratios in primary educations. It has been observed that there are equal proportions for boys and girls living in AJK, which is a very positive sign. While, it is slightly below 1 in most provinces which is signifying fairly equal proportions of boys and girls, with slightly higher enrolment ratios for boys. FATA shows the worst condition of GPI for GER in primary education which is due to the culture and traditions of tribal areas.

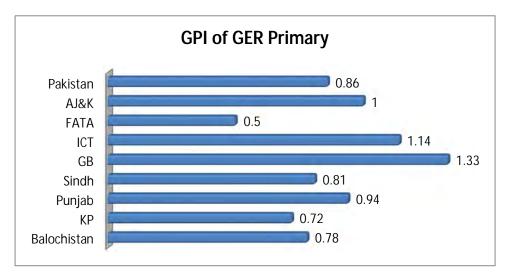

Figure 4.7: GPI of GER Primary

4.2.3 GPI for Enrolment Ratios in Secondary Education

GPI for Enrolment Ratios in secondary level of education is shown in figure 4.8. Here we see an alarming situation as GPI indicates inequitable distribution in cases of Balochistan and KPK in addition to FATA. What we have observed is that GPI starts declining in case of higher levels of educations.

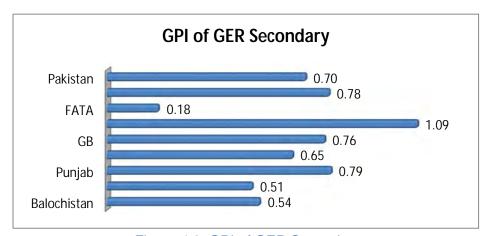

Figure 4.8: GPI of GER Secondary

4.2.4 Percentage of Female Enrolment

The percentage of female enrolment also reflects the equity in education system of the country. Number of female enrolment expressed as a percentage of total enrolment at one particular education level such as primary, secondary, vocational and technical.

Percentage of Female Enrolment

r creentage of remaie Emounent											
Province / Stage	Pre Pri	Pri	Mid	Upper Sec.							
Pakistan	44.39%	44.45%	42.95%	37.34%							
Punjab	46.40%	46.94%	45.80%	41.17%							
Sindh	44.98%	42.32%	44.51%	34.16%							
KP	40.81%	40.25%	34.19%	28.77%							
Balochistan	37.81%	40.32%	35.23%	34.18%							
AJ&K	46.82%	48.62%	46.65%	39.85%							
GB	42.51%	55.32%	42.35%	44.93%							
FATA	32.30%	31.89%	15.04%	15.90%							
ICT	47.40%	50.79%	50.02%	52.02%							

Pri=Primary, Mid=Middle, Sec=Secondary

Table 4.1: Percentage of Female Enrolment

This indicator shows the degree of female participation in these education levels.

However, one may need to look at population structure of those particular age-groups to interpret correctly

4,2.5 Percentage of Female Enrolment by Location

When we say percentage of female enrolment it means that percentage of female students in urban and rural areas of the country. This indicator measures the location and gender wise disparity of education system

Province / Stage	Urban	Rural	Total		
Pakistan	46	42	43		
Punjab	48	44	46		
Sindh	46	37	42		
KP	40	38	39		
Balochistan	39	39	39		
AJ&K	47	47	47		
GB	45	40	42		
FATA	-	30	30		
ICT	48	51	49		

Table 4.2: Percentage of female enrolment by location

4.2.6 Percentage of Female Teachers

Number of female teachers expressed as a percentage of total number of teachers in one particular education level such as primary, secondary, vocational and technical.

This indicator shows the gender composition of the teaching force. It also helps in assessing the need for opportunities and/or incentives to encourage women to participate in teaching activities at a given level of education.

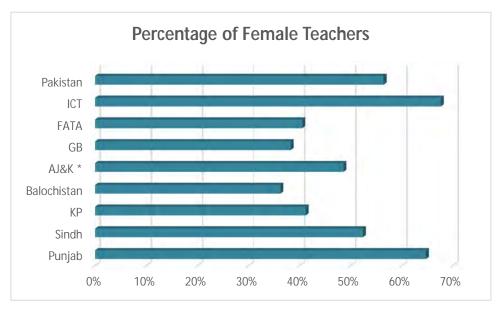

Figure 4.9: Percentage of Female Teachers

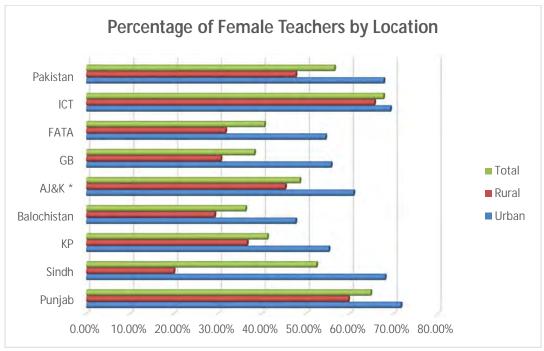

Figure 4.9 below reflects the percentage of female teachers. The overall percentage for Pakistan is good. However, it is evident that

except for ICT, Punjab and Sindh; these percentages are below par in other areas.

4.2.7 Percentage of Female Teachers by Location

The percentage of female teachers by local is reflected in table 4.10 below. As

Mentioned earlier the situation is not very good in case of rural areas, where these percentages are quite low for most parts of Pakistan.

4.3 Quality

Education is a powerful instrument of socioeconomic and political change concomitant to global, technological and democratic developments. So it is necessary to improve quality of education at different levels of education.

Quality is one of the most important dimensions of an education system. There are probably as many different ideas about quality as there are schools. Quality is creating an environment where educators, parents, government officials, community representatives, and business leaders work

together to provide students with the resources they need to meet current and future academic, business and changes.

Strengthening the quality of education has become a global agenda at all educational levels and more so at the primary level. The quality of basic education is important not only for preparing individuals for the subsequent educational levels but to equip them with the requisite basic life skills. Quality education also ensures increased access and equality and it is mainly due to these reasons that various international

Forums and Declarations have pledged improvements in quality of education.

It is pertinent to mention that quality of education can be measured from three different viewpoints i.e. quality of inputs, quality of the process, and quality of output. Input reflects the resources committed by the government and society in general for the cause of providing education; these resources include infrastructure (including facilities), various physical teaching resources, curriculum and other support materials. Quality of the process reflects how good the delivery process is, and generally measures what goes on in the classroom as well as in the school in general. The quality of output reflects the conformance of the knowledge and skill levels of students to well established standards, e.g. exam systems and their results are a useful measure of output quality.

In this report, the primary focus of our analysis is quality of input, although some indirect indicators of process like survival rate would also be considered.

Some important indicators to measure quality of education are: Pupil-teacher ratio, student-classroom ratio, number of students per textbook, number of teachers by professional qualification, number of teachers by academic qualification etc.

Presented below are some important indicators selected for this analysis, the selection of these indicators is primarily driven by the data available at NEMIS.

4.3.1 Survival Rate (SR) to Grade V

Also called Retention Rate, Survival Rate to Grade 5 is the proportion of a cohort of pupils who reached Grade 5 expressed as a percentage of pupils enrolled in the first grade of a given cycle in a given school year.

A Survival Rate approaching 100 percent indicates a high level of retention and low dropout incidence. Survival Rate may vary from grade to grade, giving indications of grades with relatively more or less dropouts. The distinction between survival rate with and without repetition is necessary to compare the extent of wastage due to dropout and repetition.

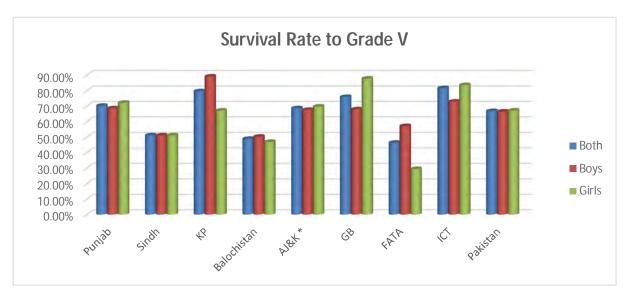

Figure 4.11: Survival Rate to Grade V

4.3.2 Pupil Teacher Ratio (PTR)

PTR is one of the most common indicators used in educational planning. A low number of pupils per teacher indicate pupils will have a better chance of contact with the teachers and hence a better teaching-learning process.

The PTR should normally be compared to established national norms on the number of pupils per teacher for each level or type of education. A high pupil-teacher ratio suggests that each teacher has to deal with a large number of pupils and that, conversely, pupils receive less attention from the teacher.

The ratio of students to teaching staff is also an important indicator of the resources devoted to education. Level wise PTR in public sector of education is shown in table 4.3

Pupil-Teacher Ratio by Level

	Pre Pri	Pri	Mid	Up.Sec						
Punjab	N/A	34	24	22						
Sindh	18	30	23	24						
KPK	N/A	41	19	23						
Balochistan	39	32	20	22						
AJK	30	25	20	16						
GB	N/A	50	23	21						
FATA	N/A	40	27	18						
ICT	18	35	43	14						
Pakistan	29	34	23	22						

Table 4.3: PTR by Level

The overall PTR (primary to higher secondary) is shown in following figure (figure 4.12)

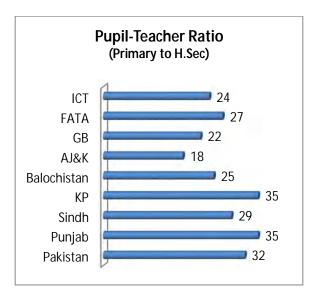

Figure 4.12: PTR

4.3.3 Pupil Classroom Ratio (PCR)

PCR is an important indicator to measure the quality of education at a particular level of education. Smaller classes are often perceived as allowing teachers to focus more on the needs of individual students and reducing the amount of class time they spend dealing with disruptions.

The overall PCR (Primary to Upper Secondary) at national level in public sector of education is shown in following figure.

4.3.4 Availability of Physical Facilities

Infrastructure also affects quality of education; the availability of proper physical facilities plays a vital role in quality of

	Pri	Mid	Up. Sec.
Punjab	38	37	48
Sindh	37	26	49
KP	45	26	38
Balochistan	29	25	35
AJK	-	-	ı
GB	23	29	26
FATA	49	28	37
ICT	56	89	20
Pakistan	40	35	46

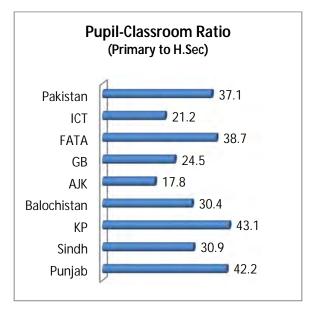

Figure 4.13: PCR

education, but it is not necessary that a wellestablished school having all the physical facilities may also produce quality education.

School building, drinking water, boundary wall, electricity and toilets for students are considered as basic facilities and these directly affect the quality of education.

It must be pointed out that research has shown that availability of these facilities have a direct impact on the retention of students e.g. unavailability of latrine facility for female students at higher classes is known to impact the decision to leave school.

4.3.5 Electricity

In summer season, non-availability of electricity affects the performance of teachers as well as students, especially in the hot areas. The performance of schools having computer and science labs also effects with non-availability of electricity. Figure 4.14 presents the status of availability of electricity.

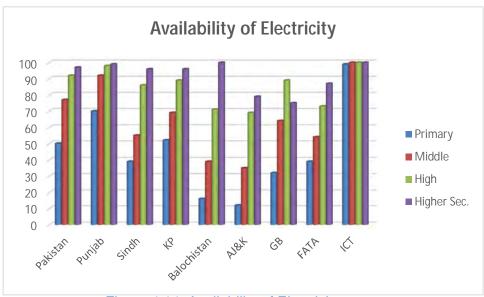

Figure 4.14: Availability of Electricity

4.3.6 Drinking Water

Water is basic necessity of life; availability of clean drinking water is an essential need of any population group, especially young children attending school. Figure 4.15 shown status of drinking water availability.

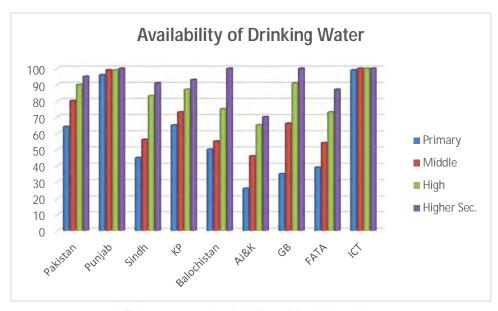

Figure 4.15: Availability of Drinking Water

4.3.7 Toilets for Students

This is another essential facility which may become critical in certain cases as mentioned earlier. It has been observed that even in cases where this facility is reported to be available, there are many instances where the facility is un-usable during to poor maintenance, and effectively the schools are without this facility. The availability status of Student Latrines is presented in Figure 4.16.

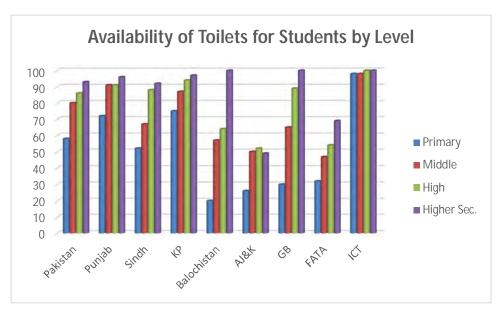

Figure 4.16: Availability of Toilets

4.3.8 Boundary Wall

Figure 4.17: Availability of Boundary wall

The availability of boundary wall is gaining increased importance due to law and order problems. Especially, in case of female education institutions, this is an essential

facility. Figure 4.17 reflects the status of boundary wall availability.

Calculation Methods for Indicators

This section will explain how to calculate indicators used in this publication.

Gross Enrolment Ratio (GER):

GER can be calculated by using following formula.

Net Enrolment Ratio (NER)

The following formula is used for calculation of NER.

Gross Intake Ratio (GIR)

Net Intake Rate (NIR)

Survival Rate to Grade V

Divide the total number of pupils belonging to a pupil cohort who reached Grade 5 of primary education by the number of pupils in the original pupil cohort, i.e. those pupils who enrolled together in the first grade of primary education, and multiply by 100.

Usually this indicator is derived using reconstructed student cohort flow model. It requires the following data.

- Number of students enrolled by grade for two consecutive years
- Number of repeaters by grade in the second school year
- Number of graduates (successful completers) in the first school year
- Number of net transfer students (optional)

Transition Rate (TR)

When data on new entrants to the next higher grade is not available, subtract the number of repeaters from the total enrolment of the first grade of the next higher level to get the number of new entrants into the first grade of the next higher level. Divide the result by the total number of pupils in the last grade of the first level in the previous year.

$$\begin{array}{c} E-R \\ TR_{\,Pri\,to\,\,Sec,\,\,t} = ------x100 \\ Number of pupils in the last grade of the previous level at school year t-1 \\ \end{array}$$

- 1. E = Enrolment of the first grade of the next higher level at year t
- 2. R = Repeaters of the first grade of the next higher level at year t

Gender Parity Index (GPI)

Percentage of Female Enrolment

Percentage of Female Teachers

Per cent FemaleNumber of female teachers in particular education level in school-year t

Teachers = ------ x 100

Total number of teachers in particular education level in school-year t

Pupil Teacher Ratio (PTR)

Total number of pupils in particular education level in school-year t

PTR t= ------ x 100

Total number of teachers in particular education level in school-year t

Pupil Classroom Ratio (PCR)

Total number of pupils in particular education level in school-year t

PCR t= -----x 100

Total number of Classes in particular education level in school-year t

# - 1 11 01 16		a are enrolled in one particula		

^{*}Enrolment by Stage defined as those students who are enrolled in one particular section of the school. For eample primary stage Note:

i . Other Public Sector means Public Institutions run by other than Provincial/Regional Education Departments.

- i . Public Sector data is provided by Provincial/ Regional EMISs.
- ii . Other Public and Private Sector data is estimated using past trend.
- iii. Intermediate & Degree Colleges, Technical & Vocational Institutions, Teacher Training Institutions,
- iv. BECS data is provided by National Education Foundation, Islamabad

STATISTICAL APPENDIX OF EFA INDICATORS

Gross Enrolment Ratio (GER) in pre-primary education and other ECCE programmes by sex

Definition

Total number of children enrolled in early childhood care and education programmes, regardless of age, expressed as a percentage of the population in the relevant official age group.

Formula

$$\mathbf{GER}_{ECCE}^t = \frac{\mathbf{E}_{ECCE}^t}{\mathbf{P}_{ECCE}^t} * 100$$

where

 \mathbf{GER}^t_{ECCE}

Gross enrolment ratio in ECCE programmes in school year t

 $\mathbf{E}_{ECCE}^{\iota}$

Number of children enrolled in ECCE programmes in school year t

Population in relevant official age group concerned with ECCE in school

yeart

Gross Enrolment Ratio (GER) in Pre-Primary					
	Total	Male	Female		
Pakistan	66.44%	70.34%	62.22%		
Balochistan	63.85%	74.17%	52.09%		
FATA	57.16%	69.75%	43.69%		
GB	30.42%	34.04%	26.52%		
ICT	44.91%	44.24%	45.65%		
KP	88.18%	97.79%	77.87%		
Punjab	71.24%	73.24%	69.12%		
Sindh	48.95%	51.84%	45.75%		
AJ&K	54.79%	55.86%	53.67%		

Gross Intake Rate (GIR) in primary education, by sex

Definition

Total number of new entrants in Grade 1 of primary education, regardless of age, expressed as a percentage of the population at the official primary school entrance age.

Formula

$$\mathbf{GIR}^t = \frac{\mathbf{N}^t}{\mathbf{P}_a^t} * 100$$

where \mathbf{GIR}^t

Gross intake ratio in school yeart

 \mathbf{N}^t Number of new entrants in Grade 1 of primary education, in school year t

Population of official primary school entrance agea, in school year

Gross Intake Rate (GIR)					
	Total	Male	Female		
Pakistan	103.87%	110.19%	97.04%		
Balochistan	74.26%	83.02%	64.24%		
FATA	106.65%	134.83%	76.59%		
GB	112.43%	95.50%	131.06%		
ICT	80.17%	74.13%	86.82%		
KP	119.55%	132.38%	105.79%		
Punjab	106.57%	108.94%	104.04%		
Sindh	100.11%	110.43%	88.70%		
AJ&K	66.83%	66.61%	67.06%		

Net Intake Rate (NIR) in primary education, by sex

Definition

New entrants to Grade 1 of primary education who are of the official primary school entrance age, expressed as a percentage of the population of the same age.

Formula

$$\mathbf{NIR}^t = \frac{\mathbf{N}_a^t}{\mathbf{P}_a^t} * 100$$

where.

NIR^t Net intake rate in school yeart

 \mathbf{N}_a^t Number of children of official primary school entrance age a who enter Grade 1 of

primary education for the first time, in school year t

 \mathbf{P}_a^t Population of official primary school entrance agea, in school year t

	Net Intake Rate (NIR)					
	Total	Male	Female			
Pakistan	82.84%	88.03%	77.24%			
Balochistan	59.41%	66.41%	51.39%			
FATA	85.32%	107.86%	61.27%			
GB	64.84%	64.21%	65.53%			
ICT	64.14%	59.30%	69.45%			
KP	95.64%	105.91%	84.63%			
Punjab	85.26%	87.15%	83.23%			
Sindh	80.09%	88.35%	70.96%			
AJ&K	53.46%	53.29%	53.65%			

Adjusted net enrolment ratio (ANER), by sex

Definition

Total number of pupils of the official primary school age group who are enrolled at primary or secondary education, expressed as a percentage of the corresponding population.

Calculation Method

Divide the total number of pupils in the official primary school age range who are enrolled in primary or secondary education by the population of the same age group and multiply the result by 100.

Adjusted net enrolment ratio (ANER)					
	Total	Male	Female		
Pakistan	68.46%	73.35%	63.16%		
Balochistan	49.77%	55.50%	43.17%		
FATA	63.47%	83.83%	41.80%		
GB	68.81%	69.04%	68.56%		
ICT	71.44%	67.12%	76.20%		
KP	83.26%	96.10%	69.48%		
Punjab	70.82%	72.85%	68.66%		
Sindh	61.15%	67.08%	54.58%		
AJ&K	54.25%	54.28%	54.21%		

Survival Rate to Grade 5 in primary education, by sex

Definition

The percentage of a cohort of pupils or students enrolled in the first grade of a given level or cycle of education in a given school year who are expected to reach a given grade, regardless of repetition.

Formula

$$\mathbf{SR}_{g,i}^k = \frac{\sum_{t=1}^m \mathbf{P}_{g,i}^t}{\mathbf{E}_g^k} * 100 \\ \mathbf{where} \mathbf{P}_{g,i}^t = \mathbf{E}_{g,i+1}^{t+1} - \mathbf{R}_{g,i+1}^{t+1}$$

where $\mathbf{SR}_{g,i}^k$ Survival Rate of pupil-cohort g at grade i for a reference year k \mathbf{E}_g^k Total number of pupils belonging to a cohort g at a reference year k Promotees from \mathbf{E}_g^k who would join successive grades i throughot successive years t Number of pupils repeating grade i in school year t grade (1, 2, 3, ..., n) year (1, 2, 3, ..., m) pupil-cohort

Survival Rate to Grade 5					
	Total	Male	Female		
Pakistan	66.79%	66.51%	67.14%		
Balochistan	48.88%	50.24%	46.89%		
FATA	46.35%	57.08%	29.36%		
GB	75.85%	67.93%	87.78%		
ICT	81.62%	72.91%	83.56%		
KP	79.60%	89.09%	67.08%		
Punjab	70.22%	68.57%	72.15%		
Sindh	51.09%	51.09%	51.09%		
AJ&K	68.61%	67.57%	69.71%		

Effective Transition Rate (ETR) from primary to general secondary education, by sex

Definition

Number of new entrants to the first grade of the higher level of education in the following year expressed as a percentage of the students enrolled in the last grade of the given level of education in the given year who do not repeat that grade the following year.

Formula

$$\mathbf{ETranR}_{h,h+1}^{t} = \frac{\mathbf{NE}_{h+1,G1}^{t+1}}{\mathbf{E}_{h,Gn}^{t} - \mathbf{R}_{h,Gn}^{t+1}} * 100 = \frac{\mathbf{E}_{h+1,G1}^{t+1} - \mathbf{R}_{h+1,G1}^{t+1}}{\mathbf{E}_{h,Gn}^{t} - \mathbf{R}_{h,Gn}^{t+1}} * 100$$

where $\mathbf{ETranR}_{h,h+1}^t$	Effective transition rate from cycle or level of education h to the next level $h+1$ in school year t
$\mathbf{NE}_{h+1,G1}^{t+1}$	Number of new entrants to the first ${ m grade}G1$ at level of ${ m education}h+1$ in school ${ m year}t+1$
$\mathbf{E}_{h+1,G1}^{t+1}$	Number of pupils enrolled in the first $\mathrm{grade}G1$ at level of $\mathrm{education}h+1$ in school year $t+1$
$\mathbf{R}_{h+1,G1}^{t+1}$	Number of pupils repeating the first $\mathrm{grade}G1$ at level of $\mathrm{education}h+1$ in school $\mathrm{year}t+1$
$\mathbf{E}_{h,Gn}^t$	Number of pupils enrolled in the last $\mathrm{grade}Gn$ at level of $\mathrm{education}h$ in school $\mathrm{year}t$
$\mathbf{R}_{h,Gn}^{t+1}$	Number of pupils repeating the last $\mathrm{grade}Gn$ at level of $\mathrm{education}h$ in school year $t+1$

Effective Transition Rate (ETR)					
	Total	Male	Female		
Pakistan	77.53%	78.43%	76.38%		
Balochistan	69.23%	73.78%	62.15%		
FATA	62.25%	69.69%	39.75%		
GB	72.22%	65.72%	82.86%		
ICT	99.40%	100.94%	97.89%		
KP	84.49%	89.48%	76.54%		
Punjab	81.05%	81.19%	80.88%		
Sindh	64.51%	63.32%	66.10%		
AJ&K	76.80%	80.38%	73.16%		

Total public expenditure on education as a percentage of GNP/GDP Definition

Current and capital expenditure on education by local, regional and national governments, including municipalities (household contributions are excluded), expressed as a percentage of GDP.

Calculation Method

Divide the total public expenditure on education by the GDP of the country and multiply by 100. The indicator can also be calculated at national level.

Expenditure	(Pakistan)
Public Education Expenditure as % of GDP	2.09%
Public Education Expenditure as % of Total Public Govt Expenditure	9.75%
Total Primary Education Expenditure as % of Total Public Education Expenditure	37.15%
Public Primary Education Expenditure (Current) as % of GDP	0.75%
Public Primary Education Expenditure per pupil as % of GDP per capita	13%

Youth (15-24 years old) literacy rates, by sex

Definition

Percentage of people aged 15 to 24 years who can both read and write with understanding a short simple statement on their everyday life. Generally, 'literacy' also encompasses 'numeracy', the ability to make simple arithmetic calculations.

Formula

$$\mathbf{LIT}_{15-24}^{t} = \frac{\mathbf{L}_{15-24}^{t}}{\mathbf{P}_{15-24}^{t}} * 100$$

where

 $\operatorname{LIT}_{15-24}^t$ Literacy Rate of people $\operatorname{aged} 15-24 \operatorname{years}$ old in $\operatorname{year} t$

 \mathbf{L}_{15-24}^{t} Literate Population aged15-24 years old in yeart

 \mathbf{P}_{15-24}^t Population aged15-24 years old in year t

Youth Literacy Rate					
	Total	Male	Female		
Pakistan	71.60%	79.41%	63.37%		
Balochistan	55.92%	70.83%	33.31%		
KP	67.24%	84.31%	50.52%		
Punjab	74.53%	79.71%	69.47%		
Sindh	69.92%	77.69%	60.05%		

Gross Enrolment Ratio (GER) in secondary education by type of programme (general; technical and vocational education and training; non-formal education and skills training) and by sex

Definition

Number of pupils or students enrolled in a given level of education, regardless of age, expressed as a percentage of the official school-age population corresponding to the same level of education. For the tertiary level, the population used is the 5-year age group starting from the official secondary school graduation age.

Calculation Method

Divide the number of pupils (or students) enrolled in a given level of education regardless of age by the population of the age group which officially corresponds to the given level of education, and multiply the result by 100.

Gross Enrolment Ratio (GER) in Secondary Education					
	Total	Male	Female		
Pakistan	35.25%	40.08%	30.06%		
Balochistan	15.95%	19.53%	11.89%		
FATA	15.62%	25.36%	5.00%		
GB	45.29%	48.42%	41.75%		
ICT	86.44%	79.91%	93.45%		
KP	39.46%	50.49%	27.61%		
Punjab	37.59%	40.90%	34.08%		
Sindh	31.72%	36.68%	26.26%		
AJ&K	41.00%	44.95%	36.84%		

Adult (15 years old and over) literacy rates, by sex

Definition

Percentage of population aged 15 years and over who can both read and write with understanding a short simple statement on his/her everyday life. Generally, 'literacy' also encompasses 'numeracy', the ability to make simple arithmetic calculations. Adult illiteracy is defined as the percentage of the population aged 15 years and over who cannot both read and write with understanding a short simple statement on his/her everyday life.

Formula

$$\mathbf{LIT}_{15+}^{t} = \frac{\mathbf{L}_{15+}^{t}}{\mathbf{P}_{15+}^{t}} * 100 \underset{\mathsf{Or}}{\mathbf{ILL}}_{15+}^{t} = \frac{\mathbf{I}_{15+}^{t}}{\mathbf{P}_{15+}^{t}} * 100 \underset{\mathsf{where}}{\mathbf{LIT}}_{15+}^{t} + \mathbf{ILL}_{15+}^{t} = 100\%$$

where

where \mathbf{LIT}^t_{15+} Adult literacy rate (15+) in yeart \mathbf{ILL}^t_{15+} Adult illiteracy rate (15+) in yeart \mathbf{L}^t_{15+} Adult literate population (15+) in yeart \mathbf{I}^t_{15+} Adult illiterate population (15+) in yeart \mathbf{P}^t_{15+} Adult population (15+) in yeart

Adult Literacy Rate					
	Total	Male	Female		
Pakistan	56.16%	68.55%	43.47%		
Balochistan	43.59%	64.28%	18.87%		
KP	49.13%	68.63%	30.97%		
Punjab	57.98%	67.64%	48.39%		
Sindh	58.17%	71.26%	43.10%		

Females enrolled as percentage of total enrolment by level of education (preprimary, primary, lower and upper secondary education)

Percentage of female students *

Definition

The total number of female students in a given level of education, expressed as a percentage of the total number of students enrolled at that level of education.

Calculation Method

Divide the total number of female students at a given level of education by the total enrolment at the same level, and multiply by 100.

Percentage of Female Enrolment					
	Pre-Primary	Primary	Middle	Upper Secondary	
Pakistan	44.39%	44.45%	42.95%	37.34%	
Balochistan	37.81%	40.32%	35.23%	34.18%	
FATA	32.30%	31.89%	15.04%	15.90%	
GB	42.51%	55.32%	42.35%	44.93%	
ICT	47.40%	50.79%	50.02%	52.02%	
KP	40.81%	40.25%	34.19%	28.77%	
Punjab	46.40%	46.94%	45.80%	41.17%	
Sindh	44.98%	42.32%	44.51%	34.16%	
AJ&K	46.82%	48.62%	46.65%	39.85%	

Female teachers as percentage of total number of teachers in primary and lower and upper secondary

Percentage of female teachers *

Definition

The number of female teachers at a given level of education, expressed as a percentage of the total number of teachers at the same level of education.

Formula

$$\%\mathbf{FT}_h^t = \frac{\mathbf{FT}_h^t}{\mathbf{T}_h^t} * 100$$

where $\%\mathbf{FT}_h^t$

Percentage female teachers in educational levelhin yeart

 \mathbf{FT}_h^{ι}

Number of female teachers in educational level h in year t

 \mathbf{T}_{L}^{t}

Total number of teachers (male and female) in educational levelhin yeart

Percentage of Female Teachers				
	Primary	Middle	Upper Secondary	
Pakistan	47.56%	66.61%	57.83%	
Balochistan	31.43%	42.93%	37.98%
